**Features and benefits**

- **Safe**: lightweight, no pinch points
- **Economical**
- **Conforms to building codes**
- **Professional results**
- **Super-sized shipping and hobbyist applications**

**Features and benefits**

- **Rain-resistance**
- **Easy to set up and brace**
- ** Superior strength-to-weight properties prevent blowouts**
- **Easy to cut and drill at the jobsite**
- **Heat resistant eliminates form deformation during the pour**
- **Set and pour multiple columns at one time**

**Sizes**

- Available in standard diameters of up to 36’ and in lengths of 12’. Custom lengths also available.

---

**Features and benefits**

- **Full liquid head pressure up to 20’**
- **Stronger than standard paper; more economical than steel or fiberglass**
- **Highly water-resistant**
- **Ease to cut and drill at the jobsite**
- **Lightweight; may eliminate the need for a crane**
- **Safe; lightweight, no pinch points**

**Sizes**

- Available in standard diameters of 12” to 60” in standard lengths of 4’.

---

**Features and benefits**

- **Set and pour multiple columns at one time**
- **Easy to cut and drill at the jobsite**
- **Superior strength-to-weight properties prevent blowouts**
- **Easy to cut and drill at the jobsite**

Sonotube® Tube Base® footing forms

Sonotube® Tube Base® footing forms are used in conjunction with Sonotube concrete forms for added strength, increased stability and greater bearing capacity. As a single piece it is easier to level, and less likely to tip, tilt or move, especially during the backfilling process. The result is lower costs due to savings in time, labor and materials.

Applications
- Decks
- Porches
- Posts

Features and benefits
- More cost and time efficient than conventional wood-forming method
- Simultaneous forming of concrete footing and column
- Superior structural stability
- Decreases the potential for uplift of form due to existence of frost
- Allows for additional bearing capacity
- Made from 100% recycled plastic

Sizes
- TB 22" fits 8”/10” Sonotube forms; concrete volume 2.0 cu. ft.
- TB 28" fits 8”/10”/12” Sonotube forms; concrete volume 4.5 cu. ft.
- TB 32" fits 12”/14”/16”/18” Sonotube forms; concrete volume 7.0 cu. ft.

Sonovoid® round concrete voids

Sonovoid® round concrete voids are engineered for use with cast-in-place and pre-cast concrete. They reduce the amount of concrete, steel and supporting members needed without sacrificing integrity or strength. Voiding tubes allows greater design flexibility, permitting larger spans, better utilization of space and greater freedom in locating partitions. In many cases, construction itself is faster as larger areas can be formed and poured at once using less concrete.

Applications
- Concrete floor and roof slabs
- Bridges
- Beams
- Piles

Features and benefits
- Reduces amount of concrete, steel and supporting members needed in a project, resulting in significant savings in material
- Superior strength-to-weight properties prevents prevent collapse
- Environmentally sustainable—made from recovered paper
- Manufactured throughout North America for minimal lead times and better supply security

Sizes
Available in standard outside diameters from 6” to 36.9”, in specified lengths. Custom sizes also available.

Sonotube BlastMaster® blasting tubes

In mining operations that involve down-hole blasting, Sonotube BlastMaster® blasting tubes help loci maintain their integrity. Engineered for strength, BlastMaster tubes are manufactured using patented RainGuard® technology, making them a consistent and durable choice for providing strength without the need for wax. BlastMaster tubes can help keep the integrity of the hole prior to the blast, providing the flexibility your construction schedules demand.

Applications*
- Down-hole blasting in a quarry environment

Features and benefits
- No messy wax
- Consistent, engineered design delivers structural integrity required
- RainGuard technology resists tube delamination and collapse
- Made from recycled paper
- Manufactured and distributed throughout North America, minimizing lead times

Sizes
Available in 4.75” to 7.5” diameters, in specified lengths.

* Not designed for use in standing water.

Learn more about Sonoco's construction products

Sonotube concrete forms and Sonotube® brand void forms are available from dealers throughout North America. For additional product or technical information, please contact your distributor, call Sonotube at 888/766-8823 or visit sonotube.com.

Sonoco was founded in 1899. Sonoco is a global provider of a variety of consumer packaging, industrial products, protective packaging, and display and packaging-supply chain services. With annualized net sales of approximately $5 billion, the Company has 20,000 employees working in more than 350 operations in 34 countries, serving some of the world’s best-known brands in some 85 nations. Sonoco is proud to be a member of the Dow Jones Sustainability World index for seven consecutive years. For more information on the Company, visit our website at www.sonoco.com.
